PROJECT Mar-May-2024

Advanced Machine Learning Solutions For Detecting Inauthentic Profiles in Digital Media

- Developed and implemented advanced machine learning algorithms to identify and flag unauthentic profiles on digital media platforms.
- Designed and trained machine learning models using algorithms such as Support Vector Machine (SVM), K-Nearest Neighbors (KNN), and Naïve Bayes to achieve better accuracy.
- Collected and preprocessed large datasets to ensure high-quality input for model training.
- Implemented anomaly detection techniques to identify suspicious behavior and profiles.
- Achieved significant improvements in the detection rate of fake profiles, enhancing platform integrity and user behavior. POSITIONS OF RESPONSIBIL.
